Exercise: Write mental health:

When people say words like they don't feel good

They might be using words like depression or anxiety. Depression is a feeling that lasts. The feeling is usually described as sad, hopeless, or empty. It can affect a person's thoughts, feelings, and actions. Depression is not just a bad mood. It is a serious illness that can affect a person's life. Depression is a common mental health problem. It can be treated with therapy and medicine.

Depression is a feeling of loss or sadness that is not just a bad mood or a feeling of being down.

Depression is a feeling of loss or sadness that is not just a bad mood or a feeling of being down. It is a serious illness that can affect a person's life. Depression is a common mental health problem. It can be treated with therapy and medicine.

The biggest reason that prevents people from discussing depression is the stigma. Stigma is a feeling of being different or being less than. It is a feeling of being ashamed or embarrassed. Stigma is a common problem. It can be treated with therapy and medicine. Stigma is a feeling of being different or being less than. It is a feeling of being ashamed or embarrassed. Stigma is a common problem. It can be treated with therapy and medicine.
