

Multiplication is repeated addition. The first number tells you how many groups to make; the second number tells you how many objects are in each group. You then count the number of objects to find the

answer. $2 \times 3 = 6$ is the same as $3 + 3 = 6$

Multiply	Picture	Add
$3 \times 6 =$		
		$9 + 9 =$
$4 \times 6 =$		
		$5 + 5 + 5 + 5 + 5 =$
$3 \times 3 =$		
		$6 + 6 =$
