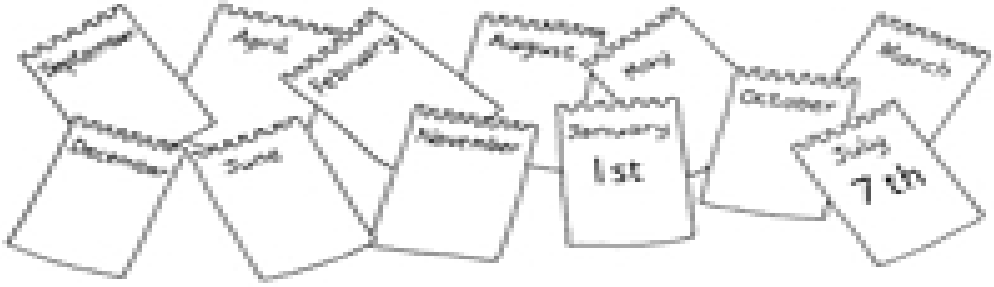
Do you know?

Put the months in order by writing a number on each page.



How many ...

... seconds in a minute? ☐

... minutes in an hour? ☐

... hours in a day? ☐

... days in a week? ☐

... days in a year? ☐

... months in a year? ☐

Learn this rhyme.

30 days have September,
April, June, and November.
All the rest have 31,
Except February alone
That has 28 days clear
29 in each leap year.

How many days are there in your birthday month? ☐
