

Name: _____

Frog Life Cycle

The changes from egg to frog are called metamorphosis (met-uh-mor-fuh-siss). Cut out the sentences below. Then, paste them under the correct pictures.

Reading Comprehension/
Sequencing

Next, a tadpole swims out of the egg. It has a tail.	First, the frog starts life in an egg in the water.
Last, the tail goes away. The tadpole is an adult frog.	After a few weeks, the tadpole grows legs. It still has a tail.
