Itemized Budget

Anything and everything you want SEED to buy for you.

Think hard before proposing your budget. Here's a rough outline of the process you should use:

1. You've found a problem for which the only solution is to buy something.
2. You send an email to David Harwath (uiucieeeseed@gmail.com), the director of operations for IEEE (that means he knows what we have in the labs).
3. You ask David, "I have to do [X] in my project, so I think I need [Y] part. Do we have that in the IEEE lab, and if not, do you know where I can acquire one?"
4. David will help you solve your problem, or he will refer you to someone else who might be able to.
5. If you and Jon decide you still need a part, and IEEE does not have it, you can fill out the form below.

Parts

Part name or #, and a hyperlink to its description page at the store	Price ($)
