Scavenger Hunt Worksheet

Introduction: Teachers carefully plan their curriculum to help learners meet assessment standards, but often struggle with the creation of authentic, engaging tasks that can make powerful and appropriate use of ICT. As a coach, you must be prepared to answer the question, "What are the essential elements of a learning activity?" In this lesson you will prepare to answer that question by reviewing current research and looking at classroom examples of promising practices.

Directions: Record your answers below.

Section A: Classroom Example (10 minutes)

Working independently, review the following questions relating to the video clip you are about to see. You may want to check your responses as you watch. The facilitator will project the video onto the large screen.

1. What evidence did you observe that learners were engaged in substantive learning?

Learners:

Are active (doing, making, moving)	Are willing to edit/revise work
Take pride in their work	Perceive value/meaning in the work
Have some choice or control over the activity	Are producing work someone else will use (high-stakes feedback)
Understand what they are striving to learn	Know how their learning will be assessed
Receive frequent feedback and support	Demonstrate attention to detail and depth of learning
