

**Write a compound inequality without using "and" (hint...write it as one inequality, together). Then graph the solution set on the number line provided.**

1.  $x < 5$  and  $0 \leq x$

2.  $x > -2$  and  $x < 3$

**Graph the solution set of each compound inequality**

3.  $m \geq -5$  and  $m < 3$

4.  $p < -5$  and  $p > 4$

5.  $s < 3$  or  $s \geq 1$

6.  $n \leq -5$  or  $n \geq -1$

7.  $w > -3$  and  $w < 1$

8.  $x < -5$  or  $x \geq 0$
