Word Problems

1. Your favorite Aunt is flying to your house next month. She's coming from San Francisco to Buffalo. It's a 5 hour flight and she lives 3060 miles away from you. How fast does the plane go?

The image shows handwritten mathematical work on a yellow background. At the top right, there is a small number '6)' and a '10' with a horizontal line above it. The main work consists of several long division problems. The first is $3060 \div 5 = 612$. The second is $3060 \div 5 = 612$. The third is $3060 \div 5 = 612$. The fourth is $3060 \div 5 = 612$. The fifth is $3060 \div 5 = 612$. The sixth is $3060 \div 5 = 612$. Each problem shows the dividend, the divisor, the quotient, and the remainder (which is zero in all cases). The work is done in a cursive or slanted style. At the bottom left, there is a small logo for 'Math-Aids.Com'.
