Background: *Staphylococcus aureus* is a gram-positive bacterium, which is found among various organisms. When you're infected with it, you'll have symptoms such as skin infections, abscesses and other diseases. Treatment's done for each case.

Wetland—An area that is periodically flooded or saturated with water during ordinary high water. When you're doing mapping, looking at the bathymetric contours and water tables, especially, helps to map them.

[illegible]
