

Complete the table below, showing equivalent fractions.

Fraction	Twelfths	Fifths
$\frac{1}{2}$ $\frac{6}{12}$		
$\frac{2}{3}$ $\frac{8}{12}$		
$\frac{3}{4}$ $\frac{9}{12}$		
	$\frac{1}{3}$ $\frac{4}{12}$	
	$\frac{2}{3}$ $\frac{8}{12}$	
		$\frac{1}{5}$ $\frac{2}{10}$
$\frac{2}{5}$ $\frac{4}{10}$		
		$\frac{4}{5}$ $\frac{8}{10}$
	$\frac{3}{5}$ $\frac{6}{10}$	
$\frac{1}{10}$ $\frac{1}{10}$		

Use the tables above to help to answer these questions:

1.  $\frac{1}{12} = \frac{1}{12}$

2.  $\frac{20}{100} = \frac{2}{10}$

3.  $\frac{7}{10} = \frac{70}{100}$
