

Name: _____

Date: _____

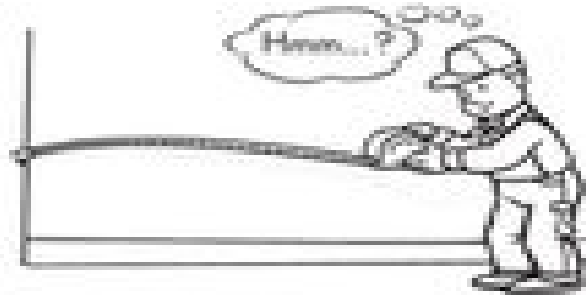

Perimeter is the distance around a figure. To find the **perimeter**, add the length of the sides together.

$$4 \text{ ft.} + 4 \text{ ft.} = 8 \text{ ft.} \text{ and } 6 \text{ ft.} + 6 \text{ ft.} = 12 \text{ ft.}$$

OR

$$4 \text{ ft.} \times 2 \text{ sides} = 8 \text{ ft.} \text{ and } 6 \text{ ft.} \times 2 \text{ sides} = 12 \text{ ft.}$$
$$8 \text{ ft.} + 12 \text{ ft.} = 20 \text{ ft. perimeter}$$

Find the **perimeter** of each shape.
