

University of Phoenix Material

Learning Objectives: Research Methods

QUESTION	ANSWER	QUESTION	ANSWER	QUESTION	ANSWER
<p>1. Which of the following is NOT a characteristic of a quantitative research design?</p> <p>a. The researcher uses a standardized instrument to collect data.</p> <p>b. The researcher uses a sample of participants.</p> <p>c. The researcher uses a nonprobability sampling method.</p> <p>d. The researcher uses a random sampling method.</p>	<p>c. The researcher uses a nonprobability sampling method.</p> <p>Quantitative research designs use standardized instruments to collect data from a sample of participants. Quantitative research designs use random sampling methods to select participants. Quantitative research designs use probability sampling methods to select participants.</p>	<p>2. Which of the following is NOT a characteristic of a qualitative research design?</p> <p>a. The researcher uses a nonstandard instrument to collect data.</p> <p>b. The researcher uses a sample of participants.</p> <p>c. The researcher uses a nonrandom sampling method.</p> <p>d. The researcher uses a random sampling method.</p>	<p>d. The researcher uses a random sampling method.</p> <p>Qualitative research designs use nonstandard instruments to collect data from a sample of participants. Qualitative research designs use nonrandom sampling methods to select participants. Qualitative research designs use nonprobability sampling methods to select participants.</p>	<p>3. Which of the following is NOT a characteristic of a mixed-methods research design?</p> <p>a. The researcher uses a standardized instrument to collect data.</p> <p>b. The researcher uses a sample of participants.</p> <p>c. The researcher uses a nonprobability sampling method.</p> <p>d. The researcher uses a random sampling method.</p>	<p>c. The researcher uses a nonprobability sampling method.</p> <p>Mixed-methods research designs use standardized instruments to collect data from a sample of participants. Mixed-methods research designs use nonrandom sampling methods to select participants. Mixed-methods research designs use nonprobability sampling methods to select participants.</p>
