Learning Objectives: Research Methods

THESIS	RESEARCH	DESIGN	DATA	ANALYSIS
<p>Abstract Methods Results Discussion</p>	<p>Abstract: Clearly explain how an abstract serves as the first step in a research project. Methods: Identify the research design. Research: Describe the research design through abstract, theory, literature, and research. Results: Describe the results through abstract, theory, literature, and research. Discussion: Describe the results through abstract, theory, literature, and research.</p>	<p>Design: Describe the design of research as the method of collecting data. Design: Describe the design of research as the method of collecting data. Design: Describe the design of research as the method of collecting data.</p>	<p>Data: Describe the data and research design. Data: Describe the data and research design. Data: Describe the data and research design. Data: Describe the data and research design. Data: Describe the data and research design.</p>	<p>Analysis: Describe the analysis of research as the method of collecting data. Analysis: Describe the analysis of research as the method of collecting data. Analysis: Describe the analysis of research as the method of collecting data. Analysis: Describe the analysis of research as the method of collecting data.</p>
