

University of Phoenix Material

Learning Objectives: Research Methods

Topic	Introduction	Methods	Design	Analysis
<p>Introduction to Research Methods</p> <p>Identify the various types of research designs and the strengths and limitations of each. Discuss the ethical considerations surrounding research and explain how to address them. Describe the process from concept development to research design and data collection. Explain the role of the researcher and the importance of research in psychology and other behavioral sciences. Discuss the importance of research design in understanding human behavior.</p>	<p>Explain the various types of research designs and the strengths and limitations of each.
