

## Imagines...

... that St. Paul has been devastated by a natural disaster. As a result, the following has happened:

- there is no electricity
- there is no running water
- all of the hospitals are closed except one which is handling emergency care
- most of the housing has been damaged or destroyed
- schools are closed
- the grocery stores have been stripped of food
- mail/couriers do not work

At your table, with your partner or group, you are to play the role of the St. Paul City Council. You have to decide together what to repair or replace or rebuild first. The people are getting frustrated and some of us are saying that maybe we need to act quickly. But in a way that will help the most people.

Your job is to decide the top 3 most important things to fix and explain your reasons for selecting the three things.

Please list the items on the explanation below.
