

## Food Chains

Sun	Plants or grass Producer	A herbivore Primary consumer	A carnivore Secondary consumer
-----	-----------------------------	---------------------------------	-----------------------------------

Draw the links in your food chain then cut each strip out.

Start with the sun. Put glue on one end and loop the strip back to form a ring. Insert the next strip through the ring, put glue on one end and loop around to make the second link. Continue until you have added all the links in your food chain.
