## Habitats

**Directions:** Where an animal lives is called its **habitat**. Animals live in certain areas of the world, and in certain types of environments. Choose two animals. Think about, or research, each animal's habitat. Draw the environment in which the animal would be found, and write about why it would live in this habitat.

A large rectangular grid for drawing a habitat. The grid is composed of small squares, with a solid horizontal line drawn across the top and another solid horizontal line drawn across the bottom, creating two main sections for drawing.

A series of ten horizontal lines for writing about the habitat.
