

Name _____

Habitats

Read about each habitat and draw a picture of it.

Desert - The desert is a very dry place. During the day it gets very hot, and at night it gets very cold. Plants like cactuses and small bushes thrive alongside animals like coyotes, rattlesnakes, and bats.

Forest - There are different kinds of forests. They all have lots of big trees, which make it easy to get lost if you don't have a map. In forests near us there are animals like foxes, owls, bears, and mountain lions.

Ocean - There are many plants and animals in the ocean. There is coral and underwater plants. There are lots of animals in the ocean, such as fish, dolphins, crabs and many more.

Grassland - Grasslands are in flat places. They are covered with grass, which moves in the wind that's almost always blowing. Animals like badgers, elk, snakes, and gophers live in grasslands.
