# Physical Vs Chemical Properties

Name the six ways the phase (state) of matter changes.

	Physical Property	Chemical Property
1. reacts with water to form a gas		
2. reacts with a base to form water		
3. hardness		
4. blue color		
5. density		
6. boiling point		
7. can neutralize a base		
8. melting point		
8. reacts with acid to form H <sub>2</sub>		
10. supports combustion		
11. sour taste		
12. luster		
13. odor		
14. flammability		
15. solubility
