

Section 2: Reading

Section 2: Reading – Multiple Choice Questions (20 questions)

1. What is the main purpose of the passage?	A. To describe the benefits of renewable energy.
2. Which of the following is NOT mentioned as a source of renewable energy?	B. Wind power.
3. According to the passage, what is a major challenge facing the development of renewable energy?	C. High initial costs.
4. The author suggests that governments should take which of the following actions to support renewable energy?	D. Provide financial incentives.
5. Which of the following is a key advantage of solar energy?	E. It is a clean and abundant source of energy.
6. The passage discusses the importance of energy storage. Which of the following is NOT a method mentioned for storing energy?	F. Pumped hydro storage.
7. According to the passage, what is a potential benefit of using renewable energy for transportation?	G. Reducing greenhouse gas emissions.
8. The author notes that the development of renewable energy requires significant investment. Which of the following is NOT a reason for this investment?	H. Research and development costs.
9. Which of the following is a key factor in determining the viability of a renewable energy project?	I. The availability of natural resources.
10. The passage highlights the role of technology in the growth of renewable energy. Which of the following is NOT a technological advancement mentioned?	J. Improved solar panel efficiency.
11. According to the passage, what is a major benefit of using wind energy?	K. It is a cost-effective and reliable source of energy.
12. The author discusses the importance of public support for renewable energy. Which of the following is NOT a way to gain public support?	L. Educating the public about the benefits of renewable energy.
13. Which of the following is a key challenge facing the development of wind energy?	M. Intermittency.
14. The passage discusses the role of government in promoting renewable energy. Which of the following is NOT a government action mentioned?	N. Establishing a renewable energy portfolio standard.
15. According to the passage, what is a potential benefit of using biomass energy?	O. It is a renewable and carbon-neutral source of energy.
16. The author notes that the development of biomass energy requires significant investment. Which of the following is NOT a reason for this investment?	P. Research and development costs.
17. Which of the following is a key factor in determining the viability of a biomass energy project?	Q. The availability of biomass feedstocks.
18. The passage highlights the role of technology in the growth of biomass energy. Which of the following is NOT a technological advancement mentioned?	R. Improved biomass conversion efficiency.
19. According to the passage, what is a major benefit of using biomass energy for electricity generation?	S. Reducing greenhouse gas emissions.
20. The author discusses the importance of public support for biomass energy. Which of the following is NOT a way to gain public support?	T. Educating the public about the benefits of biomass energy.
