

Name _____

Holiday Dice Game

Roll two dice. The lowest number on the 2 dice is the first digit. For example, a 5 and a 3 makes 35. A 4 and a 2 makes 24. If you roll an odd number, color in a section of the picture labeled "odd". If you roll an even number, color in a section labeled "even." Write down your rolls on the bottom of the page. The first player to color in the entire picture wins!
