

ISSUES IN CONSTRUCTION

When analysing and then about a presentation, consider the following:

Task-Content: What does this central concept being DISCUSSED in this context do as a function? How is this different from any other?

Task-Form: What does this central concept being DISCUSSED in this context look like? How is this different from other forms? How would this look in different structural forms? For what?

Task-Style: What does this central concept being DISCUSSED in this context look like? How is this different from other styles? What would this look like in different structural forms? For what?
