

Linear Systems (F)

Solve each system of equations.

1. $6v + 3z = -6$
 $6v - 6z = -24$

5. $6x + 2z = -2$
 $x + 2z = 3$

2. $-6b + 4v = -32$
 $2b - 4v = 16$

6. $-5v + 5y = 40$
 $-2v + 6y = 40$

3. $5a - 4u = -12$
 $2a - u = -3$

7. $-2a + 3u = 4$
 $2a + 2u = 6$

4. $-2y + 5z = -24$
 $-y + 4z = -18$

8. $2a + 4u = 0$
 $-3a + 5u = 11$
