# ☠ ZOMBIE ☠ APOCALYPSE

---

Are you prepared?  
have you got:

1. Supplies?
2. Adequate weaponry?
3. Fortified shelter?
4. An escape plan?

It is important to remain calm in the event of an outbreak, be alert but not alarmed. Survivors should proceed towards the nearest shelter and wait for emergency service. It is advised to limit contact with the infected doing so will reduce the chance of contamination. Those infected should be quarantined and brought to the attention of the officials in charge so they may receive appropriate treatment.

Ask yourself:

---

---

# ARE YOU READY?
