

## 8th Grade Math Vocabulary

### 8<sup>th</sup> Math

Absolute value	Equilateral	Midpoint	Range
Acute	Equivalent	Mode	Rate
Adjacent	Estimate	Obtuse	Rate of change
Area	Evaluate	Opposites	Ratio
Arithmetic sequence	Exponent	Order of operations	Rational
Ascending descending	Extraneous	Origin	Ray
Axes	Face	Outlier	Real
Bar graph	Factor	Parabola	Reciprocal
Base	Fibonacci sequence	Parallel lines	Reflection
Biased sample	First quartile	Pascal's triangle	Regular polygon
Binomial	Form	Percent	Relation
Box and whisker	Function	Percent change	Rhomus
Circle graph	Functional notation	Perfect square	Right angle
Circumference	Geometric probability	Perimeter	Rise
Coefficient	Graph	Perpendicular	Rotation
colinear	Histogram	Pi	Rotational symmetry
Commission	Hypotenuse	Point slope form	Sample
Complementary	Hypothesis	Polygon	Scale
Composite	Image	Polynomial	Scalene
Cone	Independent variable	Population	Scatter plot
Congruent	Indirect measurement	Power	Scientific notation
Constant	Inequality	Pre-image	Segment
Conversion factor	Integers	Prime	Sequence
Coordinate plane	Intercepts	Principal	Similar
Correlation	Interest	Prism	Simple int
Correspondence	Inverse operations	Product	Simplify
Cube	Irrational number	Properties	Skew
Cylinder	Legs	Proportion	Slant height
Dependent Variable	Line	Pythagorean theorem	Slope
Diagonal	Line of best fit	Pythagorean triple	Slope-intercept
Difference	Linear equation	Quadrant	Solution
Dilation	Linear function	Quadrilateral	Solution
Direct variation	Linear regression	Quartile	Solve
Domain	Linear regression	Quotient	Sphere
Edge	Mean	Radical	Square root
Equation	Median	Radical expression	Standard form
Equations		Radicand	Stem & leaf
		Radius	Substitute
		Random	Sum
		Range	Supplementary
			Surface area
			System of
