## Elements of Art Rubric

|   | 5  | 4   | 3  | 2  | 1   |
|---|--|---|--|--|---|
| Elements of Art -<br>Comprehension of Use in<br>Project as a Whole. | No significant omissions;<br>effective use of the Elements<br>of Art throughout the design<br>process to produce a<br>cohesive end product.<br>Application of Principles of<br>Art in the arrangement of<br>final product. | Project considered in very<br>wide context; reasonable use<br>of the Elements of Art<br>throughout the design pro-<br>ess to produce a thoughtful<br>end product. Some evidence<br>of advance arrangement<br>using the Principles of Art. | Adequate scope of relevant factors; adequate use of the Elements of Art throughout the design process to produce an end product. Little evidence of advance arrangement using the Principles of Art. | Few additional factors other<br>than immediate focus;<br>limited use of the Elements<br>of Art throughout the design<br>process to produce the<br>product. No evidence of<br>advance arrangement<br>beyond the basic concept(s). | Very limited viewflocus; unable to use the Elements of Art, as a whole or in part, throughout the design process in an attempt to produce a product. Absolutely no extension beyond the basic concept(s). |
| Planning and Organization of Work                                   | Effective use of class time;<br>demonstrates clear focus and<br>intent throughout the design<br>process.   | Reasonable use of class<br>time; illustrates intelligent<br>use of modifications to<br>original design idea.  | Adequate use of class time;<br>manages effort throughout<br>the design process.  | Limited use of class time;<br>recognize need for planning<br>in and throughout the design<br>process.  | Off-task for majority of<br>class time, failure to produce<br>original plan or adequately<br>modify or re-design.   |
| Craftsmanship   | Neat execution. Exhibits<br>intent while recognizing<br>own limitations.   | Above average rendering<br>with slight deficiencies<br>evident in final project.  | Adequate degree of skill achieved.   | Shows some evidence of skill in limited area.  | Unable to recognize own ability; hindered by limitations.   |
| Quality of Evaluation/Critique/<br>Review                           | Able to produce thoughtful review of design process and objective criticism.   | Very fair review with few<br>areas of neglect; final project<br>reasonably evaluated.   | Adequate review; student notes some areas for improvement.   | Only limited ability to review progress and actions of design process.   | Unable to criticize own actions and progress during the design process.   |
| Self Reliance and Initiative  | Can be left to work alone<br>most of the time following<br>instruction.  | Needs minimal supervision following instruction.  | Required no more supervi-<br>sion following instruction<br>than might be expected.   | Needed a disproportionate<br>amount of the teacher's time<br>following instruction.  | Unable to work without continuous help from teacher following instruction.  |
| Safe Use of Media/Equipment   | Effective display of safety<br>when handling media/<br>equipment.  | Reasonable display of safety<br>when handling media/<br>equipment.  | Adequate use of media/<br>equipment, possible safety<br>violation.   | Poor or wasteful use of me-<br>dia/equipment; unintentional<br>safety violations.  | Blatant disregard for safety in use of media/equipment.   |
| Project Extension and Application                                   | Effective application of<br>concepts, techniques and/or<br>processes to other creative<br>endeavors.   | Reasonable application of<br>concepts, techniques and/or<br>processes to other creative<br>endeavors.   | Adequate application of<br>concepts, techniques and/or<br>processes to other creative<br>endeavors.  | Limited ability to apply concepts, techniques and/or processes to other creative endeavors.  | Unable to apply concepts,<br>techniques and/or processes<br>to other creative endeavors.  |
| Examiner Review/Comments/Total                                      |  |   |  |  |   |
