

Career Goal Setting Outline

Main Career Goal: (long-term goal): _____

What process goals do you need to achieve to be able to reach your Main Career Goal (Determine whether it is a long term or short term goal)?	Explain why your goal is a SMART goal. Also explain any mini-goals you might need to achieve to meet the process goal.
<p>Goal # 1: EXAMPLE Pass all my math courses with at least a 90 or better (this might be a goal for a student planning to go to college to be a math teacher)</p> <p>Long-term goal: will take four years of high school to achieve</p>	<p>Specific- GPA of 90+ in every math course Measureable- reaching a 90+ average in each course Attainable- will require a great deal of studying, but it is reasonable to assume I can achieve it since I already do well in math. Realistic- 90+ is not unrealistic for a math teacher and I have the ability to do it. Time- each school year I will come closer to achieving this goal- the plan will span four years.</p> <p>Mini-Goals: *Spend one hour each night on math homework * Pass college level pre-calculus with a 90 average.</p>
<p>Goal # 1:</p>	
<p>Goal # 2:</p>
