

Compost heap food chain

- You will need a set of 12 composting creature pictures (your teacher will hand these out).
- Decide who eats what, and which group each creature belongs to.
- Once you have decided, stick the pictures down in the relevant box.
- You will get two points for each creature in the correct group.

The waste in the compost bin is first eaten by this group of creatures

These creatures are then eaten by this group

Who are then eaten by this group
