

### Division

Did you know that division is the inverse of multiplication?

This makes life much simpler.

If you know that:  $6 \times 2 = 12$  then you can make two-division sentences:

$$12 \div 6 = 2 \quad \text{and} \quad 12 \div 2 = 6$$

Make two-division sentences from these multiplications:

1.  $5 \times 2 = 10$

and

$$\square + \square = \square$$

$$\square + \square = \square$$

2.  $4 \times 3 = 12$

and

$$\square + \square = \square$$

$$\square + \square = \square$$

3.  $5 \times 8 = 40$

and

$$\square + \square = \square$$

$$\square + \square = \square$$
