

Find the percent of each number. Use a proportion or an equation.

- 1) 82% of 78 2) 15.2% of 118 3) 1.2% of 180
- 4) 112% of 80 5) 148% of 75 6) $\frac{1}{4}$ % of 120
- 7) $4\frac{1}{2}$ % of 97 8) 9.2% of 81 9) 2.8% of 82
- 10) 6.8% of 125 11) $\frac{2}{3}$ % of 99 12) 6.2% of 158

13) The Woods family are taking a 7,150 mile trip. In the first three days, they have covered 25% of the trip. How many miles have they travelled so far?

14) Mandy bought a television on sale. The television usually costs \$399.99, but was 75% of that price. How much did the TV cost?

15) During the sales television sale, 400 people went into the store. If $\frac{1}{2}$ % purchased at least one item, how many people bought something in the store during the sale?
