

On your head is your hair -
You can wear your hair long
Or you can wear your hair short

On your face
your eyes, nose and lips
are placed,
And at the side
are your ears
to help you hear.

You hear with your ears,
You see with your eyes,
You smell with your nose
And kiss with your lips.

Your lips are about one metre
from your nose
- about your finger!
And your nose is nearly two metres
from your big toe
if you grow full-size.
And don't forget your eyes
- they're about one metre
from your thighs.
And your lovely white teeth
- about two metres from your dainty feet!

Let's add them together:

Two lips and two lips,
One nose, two big toes,
Two eyes and two thighs,
Lots of lovely white teeth
And two dainty feet!

That's well over thirty body parts, I suppose!
Add on fingers, two thumbs,
And every other toe.
That's well over sixty, as far as I know!
