

Character and Functionality Exercise (Sheet 2)

With these two concepts in mind, please answer:

Character

A. Differentiation

- Identify some characteristics which distinguish different types of material objects (e.g.,
solidness or flexibility).

Properties/Function and Utility are also key areas:

- Character areas: Association areas (e.g., the person associated with your name, your other two
nearest objects).
A few reasons for this: proper, being flexible.

B. Similarity and Functionality

- Association similarities (e.g., the person, place, thing, etc. that you associate with your name, your other two
nearest objects).
- A few reasons for this: proper, being flexible.

Functionality

1. Classification of materials into physical properties:

• Solids	• Liquids	• Gases
• Flexible	• Rigid	• Stiff
• Dense	• Sparse	• Light

2. Classification of materials into functional properties:

• Plastic	• Elastic	• Hard
• Soft	• Rigid	• Soft
• Durable	• Breakable	• Durable

3. Functional Use/Functionality:

- how soft and flexible it is enough to be able to hold it firmly in hand.

- its function in our everyday life.

- how clean they look and the taste of them.
