| <ul style="list-style-type: none"> • Provides directed and on-topic search results • Information is organized uniformly in company profiles, making it easy to pinpoint relevant information • Companies come from a wide range of geographic locations • Comprehensive representation of various sectors • Easy to make notes and discuss with team • Direct short list-to-Excel export feature is very useful • Also a plus: enables user to add companies that aren't already included in the catalog (so that the Team Tools can include all companies under consideration, and keep them in the same environment) | <ul style="list-style-type: none"> • Site was searchable • Ability to tag favorites worked well (Push Pin tool) • Personal and team ranking of companies worked well • Not sure how viable the search-relevance percentages are • Team chat forum • Decent visibility all the way around • Notation abilities on specific companies is good • Liked the "prior search" features • Liked the ability to enter companies that were not in the catalog that I may know of • Still need to drill down a bit on what companies actually do or do not have, make it basic • Fairly comprehensive |
