## Sweet Treat Factory

The Sweet Treat Factory is trying out a new machine that can both copy and enlarge its candy creations!

**Part I:** A peanut butter polygon was placed in the machine. A few seconds later, a duplicate piece of candy was made. Draw this congruent polygon in the right half of the grid below.

**Part II:** Next, the machine was set to enlarge the peanut butter polygon. Yay! Draw this similar polygon in the grid below. It has been started for you.
