

**What Is a Sustainable Future?** (40%) The question is: Are these actions effective and efficient, timely, appropriate, responsible, or sustainable?

1. The time and effort involved.
  2. What is more valuable?
  3. What role that these actions have in their surrounding ecosystems.
  4. What would have been better alternative actions.
  5. How much funding there is available.
  6. The strengths and limitations of each alternative action.
  7. Who will be most affected by the actions?
  8. Other choices have the same?
  9. Any other effects that these actions could have on people?
  10. Can these actions increase the native habitat for native species?
  11. What other actions have been taken to protect these species?
  12. What the laws and regulations to protect these species.
  13. How does this fit into the larger picture?
  14. Who benefits or loses from the proposed changes? Can everyone benefit equally?
  15. Is this action taken for the short term or long term?
  16. What longer term effects may occur if this continues?
  17. The new president's proposed policies.
  18. The other consequences on the environment.
  19. Who wins or loses against the current conditions?
  20. The overall health and well-being of people and the environment.
- What Is a Sustainable Future Again?** Just like the subject and goals of climate, this is open ended.
1. What makes a place (i.e., city) among the most sustainable in the world?
  2. The United Nations World Climate Day and Climate actions.
  3. One of the countries that have implemented many of these.
