17	Sequence
18	Characteristics
19	Review (Pages 16-18)
20	Degree
21	Measurement
22	Worker to Tool
23	Location to Object
24	Category
25	Review (Pages 20-24)
26	Review (Pages 16-25)
27	Review (All Pages)
28	Review (All Pages)

This book helps students understand the relationship between words or concepts and prepares them for the many types of analogies they will encounter on standardized tests. The first two pages explain what analogies are and instruct students on the best way to work with analogies. Other pages focus on a particular type of analogy and then require students to complete several examples. This book also contains many review pages which require students to work with a variety of analogy types, as they would when completing a standardized test.
