Math Practice: Understanding Shapes (3.G.1)
A parallelogram is a quadrilateral with parallel *opposing* sides. Circle all the quadrilaterals that are parallelograms.

Write the name of the parallelogram on the line.

Sort the shapes. Write the letters of the shapes under the correct category headings.

Has 4 right angles	Has 2 pairs of parallel sides	Has at least 1 line of symmetry
_____	_____	_____
_____	_____	_____
_____	_____	_____
_____	_____	_____

Thinking about shapes. Draw a picture of a trapezoid. Draw a picture of a rhombus. How are they alike? How are they different?

Trapezoid   Rhombus

Write a statement that tells how they are alike.

_____

Write a statement that tells how they are different.

_____
