

Hot stuff

Observations

Some things respond to heat by getting runny. They are melting, just like your ice cream cone on a sunny day. They are changing from a solid to a liquid.

Science activity

Write an M by the things that melt when they are put into warm places.

metal spoon

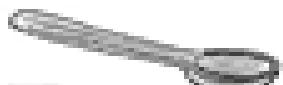

popsicle

Jell-O

teapot

wooden spoon

chocolate bar

butter

candle

Science exploration

What happens to an ice cube placed in an empty cup in your room?
