Sections within this explanation:

- Introduction to worksheets within spreadsheet.
- What readers familiar with version 5.1.3 should look at first.
- What new readers should look at first.
- Possible future changes.
- More detailed information on worksheets.

### Introduction to worksheets within spreadsheet

<b>Explanation</b>	This worksheet.
<b>BCIS v5.1.3</b>	The BCIS dataset as at 28 October 2004.
<b>Differences</b>	The differences between <b>BCIS v 5.1.3</b> and <b>BCIS v 5.2.3</b> .
<b>BCIS v5.2.3</b>	The BCIS dataset as at 15 March 2005. Note, this is the date the dataset was finalised. It is not the implementation date which is not defined within this document.
<b>Format of datasets</b>	Defines each column of <b>BCIS v 5.1.2</b> and <b>BCIS v 5.1.3</b> and terms such as "volatile" and "depreciated."
<b>Format of differences</b>	Explains the notation used in <b>Differences</b> .

### What readers familiar with version 5.1.3 should look at first

Readers familiar with version 5.1.3 may find it helpful to start with **Differences** which is an automatically generated comparison between the 5.1.3 and 5.2.3 versions of the dataset. The format of **Differences** is explained in the worksheet **Format of differences**.

You may also find *Possible future changes* a helpful introduction.

### What new readers should look at first

**Format of datasets** describes the format of **BCIS v 5.1.3** and **BCIS v 5.2.3**.
