

Name _____

Count and Match

Identify equal amounts.

Draw a line to connect the groups that have the same number of objects.

The image contains two columns of objects for a matching exercise. The left column has four groups: three hearts, four butterflies, five circles, and one house. The right column has four groups: one rabbit, five motorcycles, three stars, and four leaves. A line is drawn from the group of three hearts on the left to the group of three stars on the right.
