

Proportional vs Non-proportional Relationships

Proportional Relationship: The graph of a proportional relationship will pass through the origin, $(0, 0)$

Non-proportional Relationship: The graph of a non-proportional relationship will not pass through the origin.

Identify whether each graph is a proportional or non-proportional relationship by circling the appropriate word.

<p>1.</p> <p>Proportional non-proportional</p>	<p>2.</p> <p>Proportional non-proportional</p>	<p>3.</p> <p>Proportional non-proportional</p>	<p>4.</p> <p>Proportional non-proportional</p>
