A TRIP TO THE SCIENCE MUSEUM

Last Friday, Mrs. Rivera's fifth-grade class visited the city's science museum. The students were most excited to explore the "Space and Beyond" exhibit. They saw models of rockets, tried a gravity simulator, and even touched a real meteorite!

After lunch, the class attended a science show where liquid nitrogen was used to freeze flowers and balloons. Everyone agreed it was the best school trip of the year.

Questions:

- 1. What was the name of the exhibit the students liked most?*
- 2. What could the students do at the exhibit?*
- 3. What happened during the science show?*
- 4. What made this field trip special?*
- 5. Which word from the passage means "a rock from space"?*
