THE PLASTIC PROBLEM

Plastic pollution is one of the world's most urgent environmental issues. Every year, millions of tons of plastic end up in oceans, harming marine life.

Animals often mistake plastic for food, which can lead to death. In response, many countries are banning single-use plastics and encouraging recycling.

Solving this problem requires effort from individuals, businesses, and governments alike.

Questions:

- 1. What is the main problem described in the passage?*
- 2. How does plastic affect marine animals?*
- 3. What actions are being taken to reduce plastic pollution?*
- 4. Why is cooperation important in solving this issue?*
