READING COMPREHENSION WORKSHEETS

THE SCIENCE FAIR

Maya spent three weeks building a model volcano for the school science fair. She used clay, baking soda, and vinegar to create a realistic eruption.

When it was her turn to present, the volcano bubbled and overflowed perfectly. Everyone clapped, and Maya won first prize for creativity and presentation.

Questions:

1. What did Maya build for the science fair?
2. How long did she work on it?
3. What ingredients did she use?
4. What happened during her presentation?
5. What prize did she win?
