Valentine's Day Word Problems

Read each Valentine's Day word problem carefully.

Show your work and write the correct answer in the blank space.

Use addition, subtraction, multiplication, or division to solve each question.

1. Sarah bought 12 Valentine cards. She gave 3 to her teachers and 5 to her friends.
How many cards does she have left?

2. Jack wants to make 24 cupcakes for his class. Each box holds 6 cupcakes.
How many boxes does he need?

3. Lily bought 3 bouquets of roses. Each bouquet has 8 roses.
How many roses does she have in total?

4. A box of chocolates costs \$8. Mia buys 4 boxes for her friends.
How much money does she spend?

5. There are 30 students in a class. Each student receives 2 Valentine stickers.
How many stickers are needed in total?

6. Emma had 50 candies. She gave 15 to her brother and 10 to her cousin.
How many candies are left?

7. A bakery sold 45 heart cookies in the morning and 36 in the afternoon.
How many cookies were sold that day?

8. Noah wants to make Valentine cards. Each card takes 7 minutes to make.
If he makes 5 cards, how long will it take?

9. A candy bag has 120 hearts. If 8 friends share them equally,
how many hearts does each friend get?

10. Ava and Liam bought 3 chocolate boxes together.
Each box has 9 chocolates. They want to share them equally.
How many chocolates will each person get?
