# A DAY AT SCHOOL

School is an important place where students learn new things every day.

In the morning, students arrive at school and go to their classrooms.

They study subjects like math, reading, science, and art.

During lessons, teachers explain the material and help students understand.

Students listen carefully, ask questions, and complete their work.

At break time, students can relax, talk with friends, and eat snacks.

School also teaches students how to work together and follow rules.

Even though school can be challenging, many students enjoy learning and spending time with their classmates.

## Questions:

1. What do students do when they arrive at school in the morning?

\_\_\_\_\_

2. Name two subjects students learn at school.

\_\_\_\_\_

3. How do teachers help students during lessons?

\_\_\_\_\_

4. What do students do during break time?

\_\_\_\_\_

5. Why do many students enjoy going to school?
