

# Class 2

## READING COMPREHENSION

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Write the answer in other paper.

Germs are tiny and little and we can't see them.

They can be found all around us. Germs are on things we touch. They are in the air we breathe.

Some germs can make us sick. Not all germs will make us sick. We need to wash our hands with soap and warm water. Hands should be washed for at least 20 seconds. Hands should be washed before we eat and when we use the bathroom. We need to cover our mouth and nose when we cough or sneeze. We should not touch our eyes, nose, and mouth because the germs on our hand can get into our body. We should also stay away from people who are sick. By doing these things, we can keep the germs away that make us sick.

- Underline each word that you could not read.
- Circle each word that took you more than 1 try.

1. What are germs?
2. Where can germs be found?
3. Can all germs make us sick?
4. How and when should we wash our hands?
5. What should we do when we cough or sneeze?
