all about farmers

Farmers are very important people in our communities. They grow the food we eat every day, like fruits, vegetables, and grains. Farmers work hard in their fields to grow their crops. They also take care of animals like cows, chickens, and pigs. These animals give us milk, eggs, and meat. Farmers make sure we have lots of food to put on our tables. We are thankful for farmers because they help us stay healthy and strong by giving us delicious and nutritious foods.

1.

What types of foods do farmers give us?

2.

Why are farmers important to people in the city?

3.

Is it true or false that farmers always wear big hats?
