# Welcome Spring Math Challenge

## Part 1: Garden Multiplication

The local greenhouse is getting ready for spring! Solve these problems to help them organize their inventory.

1. **Flower Rows:** There are 7 rows of tulips. Each row has 8 tulips in it. How many tulips are there in total?

\_\_\_\_\_

2. **Seed Packets:** A pack of sunflower seeds contains 9 seeds. If you buy 6 packs, how many seeds do you have?

\_\_\_\_\_

3. **Ladybug Spots:** Each ladybug has 5 spots. If there are 9 ladybugs on a leaf, what is the total number of spots?

\_\_\_\_\_

## Part 2: Spring Word Problems

Read carefully and show your work.

1. **The Rainy Day:** It rained for 45 minutes on Monday and 35 minutes on Tuesday. How many total minutes did it rain over the two days?

\_\_\_\_\_

2. **Butterfly Migration:** A group of 50 butterflies started the journey. By noon, 12 butterflies stopped to rest. How many butterflies are still flying?

\_\_\_\_\_

3. **Spring Cleaning:** You have 72 spring cleaning chores to do over 9 days. If you do the same number of chores each day, how many chores do you complete per day?
