3RD GRADE READING COMPREHENSION

THE MOON AND STARS

One night, Adam looked out his bedroom window. The sky was dark, but the moon was shining brightly.

Adam could see many stars around the moon. Some stars looked small, and some looked bright. He tried to count them, but there were too many.

Adam asked his mother why the moon looked bigger than the stars. She explained that the moon is much closer to Earth.

Questions:

1. Who looked out the window at night?

2. What was shining brightly in the sky?

3. What did Adam see around the moon?

4. Why did the moon look bigger than the stars?

5. Why couldn't Adam count all the stars?
